DataLocker SecureDisk

The Most Secure Writeable DVD and Compact Disk

DATALOCKER™
SIMPLY SECURE
www.DataLocker.com

Features

The DataLocker SecureDisk combines AES 256-bit encryption and disc burning functionality, all self-contained on a recordable CD or DVD. SecureDisk offers built-in software for disc burning and government strength FIPS 140-2 AES 256-bit encryption.

There's no software to install and no need for third-party software applications. SecureDisk addresses the needs of users who require a simple, highly secure method to transport, share and archive sensitive data and records. Secure disk is the proven choice for low-cost, high-capacity optical media that adheres to industry standards.

Easy to Use
Simply insert SecureDisk and create a password when prompted. There's even password recovery if you forget.

Automatic, Powerful Encryption
With SecureDisk you are guaranteed that your data is protected with government certified FIPS 140-2 Level 1 AES 256-bit encryption. SecureDisk cannot be written in the clear. It is always encrypted.

Securely Share
Users can easily share SecureDisk from PC to PC either as closed (CD ROM) or open discs for additional updates.
